

Virgin River Watershed Study Tamarisk Toolbox

**Ondrea Hummel
US Army Corps of
Engineers
Albuquerque District**

Components of Toolbox

- Overview of current removal/control efforts in the watershed
 - Locations, type of treatment, costs, etc.
- Extent of tamarisk throughout watershed
- Lessons Learned
- Technical considerations
- Policy/Regulatory Considerations
- **Prioritization of areas**
- **Funding Options**

Current efforts in the watershed

- Needs updated

Lessons Learned/ Technical Considerations

- What has worked, what hasn't worked
 - Types of treatment
 - Species and/or geographic dependent lessons learned
 - Restoration efforts – native species that are working, aren't working, substrate issues?
 - **Example pros/cons - see Removal Options handout; need to get Watershed specific info**
- **Acceptable kill percentages?**

Prioritization of work areas

- Handout
- Need reach designations
- Attributes to prioritize by – others?
- Section on Funding Options
